Clark Di-et is the Safe Gum.

Parents' Magazine agrees.

We've been telling mothers that Clark Di-et is the Safe Gum. That's because Di-et's sugar-free and it won't cause cavities. Quite an important thing to know, when you consider that three out of four children suffer from cavities.

Now the Safe Gum is even guaranteed. By Parents' Magazine.

Please keep that in mind next time you buy gum for your children.

Clark Di-et contains no cyclamates. It's the Safe Gum.
